WWW.LEARNPYTHON4CBSE.COM SAMPLE PAPER - 5 (2023-24) XII - COMPUTER SC(083)

TIME: 3 HRS Max Marks: 70

सामान्य निर्देश / General Instructions:

- Please check this question paper contains 35 questions.
- The paper is divided into 5 Sections- A, B, C, D and E.
- Section A, consists of 18 questions (1 to 18). Each question carries 1 Mark.
- Section B, consists of 7 questions (19 to 25). Each question carries 2 Marks.
- Section C, consists of 5 questions (26 to 30). Each question carries 3 Marks.
- Section D, consists of 2 questions (31 to 32). Each question carries 4 Marks.
- Section E, consists of 3 questions (33 to 35). Each question carries 5 Marks.
- All programming questions are to be answered using Python Language only.

	SECTION-A					
Q. No.	Question	Marks				
1	State True or False:	1				
	"Lexical unit is the smallest unit of any programming langua	age"				
2	Fill in the blank:command is used to remove the tuple from the table	e in SQL.				
	(a) update (b) remove					
	(c) alter (d) delete					
3	What will be the output of the following statement:	1				
	print ((30.0 // 4 + (8 + 3.0))					
	a. 14.75 b. 18.0					
	c18.0 d. Error					
4	Select the correct output of the code: >>> Str= "BHASHA SANGAM @ 75" >>> S=Str.partition(" ") >>> print(S) a. (@ 75' 'BHASHA', ' ', 'SANGAM,) b. ('BHASHA', ' @', 'SANGAM , 75') c. (", ' ', 'BHASHA SANGAM @ 75') d. ('BHASHA', ' ', 'SANGAM @ 75')	1				

5	In MYSQL database, if a table, I	Emp has degree 10 and cardinality 5, and	1		
	another table, Dept has degree 5 and cardinality 10, what will be the degree				
	and cardinality of the Cartesian pr	roduct of Emp and Dept ?			
	a. 50,15	. 15,50			
	c. 50,50	I. 15,15			
6	Ankur wants to transfer songs fro	m his mobile phone to his laptop. He uses	1		
	Bluetooth Technology to connect	two devices. Which type of network will be			
	formed in this case?				
	a. PAN	b. LAN			
	c. MAN	d. WAN			
7	Give the output: dic1={ `r':'red','g':'green for i in dic1:	n','b':'blue'}	1		
	print (i, end ='				
	a.rgb	b. R G B			
	c. R B G	d. red green blue			
8		elow and then choose the correct output	1		
	from the given options:	and under one control output	'		
	MN="Bharat @G20"				
	<pre>print(MN[-2:2:-2])</pre>				
	Options:				
	a. rt@2	b. 2@tr			
	c. @G20	d. 02G@			
9	Which of the following statement(executing the following code?	s) would give an error after	1		
	S="Welcome to KVS RO JAIPUR	" # Statement 1			
	print(S)	# Statement 2			
	S="Thank you"	# Statement 3			
	S[0]= '\$'	# Statement 4			
	S=S+"Thank you"	# Statement 5			
	(a) Statement 3(b) Statement 4(c) Statement 5(d) Statement 4 and 5				
		[2]			

```
What possible outputs(s) will be obtained when the following code is
10
                                                                               1
       executed?
       import random
       Signal=['Stop','Wait','Go']
       for K in range (2,0,-1):
           R=random.randrange(K)
           print(Signal[R], end='#')
       options:
       a. Stop#Go#
       b. Wait#Stop#
       c. Go#Stop#
       d. Go#Wait#
11
       Fill in the blank:
                                                                               1
       .....is a communication methodology designed to deliver emails over
       Internet protocol.
          a. VIOP
          b. SMTP
          c. PPP
         d. HTTP
12
       Consider the code given below and find correct output:
      x=5
      def function1():
             global x
             y=x+x*2
             print(y,end=",")
      x=7
      function1()
      print(x)
       Output:
          a. 21,7
         b. 15,5
         c. 21,5
          d. 15, 7
```

13	State whether the following statement is True or False:	1
	Exception handling can be done for both user-defined and built-in exceptions.	
14	Which of the following statements is FALSE in reference to MySQL? a. It is an RDBMS. b. It is case sensitive. c. It is an open source. d. It is ideal for both small and large applications.	1
15	Fill in the blank:	1
	In case ofswitching, each information or message to be	
	transmitted between sender and receiver is broken down into smaller pieces.	
16	Which method is used to move the file pointer to a specified position.?	1
	a.tellg()	
	b.tell()	
	c.seek()	
	d.seekg()	
	Q17 and 18 are ASSERTION AND REASONING based questions. Mark the correct choice as (a) Both A and R are true and R is the correct explanation for A	
	(b) Both A and R are true and R is not the correct explanation for A	
	(c) A is True but R is False	
	(d) A is false but R is True	
17	Assertion(A): Access mode 'a' opens a file for appending.	1
4	Reasoning(R): The file pointer is at the end of the file if the file exists.	
18	Assertion(A): A function is block of organized and reusable code that is used to perform a single, related action.	1
	Reasoning(R): Function provides better modularity for your application and a high	
	degree of code reusability.	
		1

	SECTION B	
19	(i) Expand the following terms: SMTP, IMAP	1+1=
	(ii) Give one difference between Active Hub and Passive Hub.	
	OR	
	(i) Define the term Protocol with respect to networks.	
	(ii) How is Hub different from Switch?	
20	Harsh has written a code to input a number and find a table of any number. His code is having errors. Rewrite the correct code and underline the corrections made. def table(): n=int(("Enter number which table U need: ") for i in (1,11): print("Table of Enter no=",i*i) Table()	2
21	Write a function countMy(SUBJECT) in Python, that takes the dictionary, SUBJECT as an argument and displays the names (in uppercase) of the subjects whose names are longer than 5 characters. For example, Consider the following dictionary SUBJECT={1:"Hindi",2:"Physics",3:"Chemistry",4:"cs",5:"Math"} The output should be: HINDI PHYSICS CHEMISTRY OR Write a function, lenLines(STRING), that takes a string as an argument and returns a tuple containing length of each word of a string. For example, if the string is " let us learn Python", the tuple will have (3, 2, 5, 6)	2

```
22
       Predict the output of the following code:
       tuple1 = (11, 22, 33, 44, 55, 66)
       list1 =list(tuple1)
       new list = []
       for i in list1:
            if i%2==0 :
                 new list.append(i)
            new tuple = tuple(new list)
       print(new tuple)
       Write the Python statement for each of the following tasks using BUILT-IN
23
                                                                                      1+1=
                                                                                        2
       functions/methods only:
          (i)
                To insert an element 100 at the Second position, in the list L1.
          (ii)
                To check whether all the characters in the string S1 are digits or not.
      How the pop() function is different from remove() function working with
      list in python? Explain with example.
24
      Pooja wrote a query in SQL for student table but she is not getting desired result
       select * from student where fee = NULL;
        Rewrite the above query so that she gets desired result
                                            OR
        Categorize the following commands as DDL or DML:
        INSERT, ALTER, DROP, DELETE, UPDATE, CREATE
25
                                                                                        2
       Predict the output of the following code:
       def Diff(N1,N2):
            if N1<N2:
                 return N1-N2
            else:
                 return N2*N1
       NUM=[10,23,14,54,32]
       for CNT in range (4,0,-1):
            A=NUM[CNT]
            B=NUM[CNT-1]
            print(Diff(A,B),'#', end=' ')
```

SECTION C 26 Predict the output of the Python code given below: 3 def my city (L,N): for i in range (0, N): if len(L) > 4: L[i]=L[i]+L[i]L[i]=L[i] sub=['Delhi','Jaipur','Agra','Surat','Mumbai','Bhopal'] my city(sub, 6) print(sub) Write the outputs of the SQL queries (a) to (c) based on the relation Furniture 27 1*3 Itemname Dateofstock **Price Discount** No Type 3 White lotus Double Bed 23/02/2002 30000 25 1 Pink feather 7000 20 2 Baby Cot 20/01/2002 3 Dolphin Baby Cot 19/02/2002 9500 20 4 Decent Office 01/01/2002 25000 30 Table Comfort Double Bed 12/01/2002 25000 25 5 Zone Donald Baby Cot 24/02/2002 6500 15 6 7 Royal finish Office 20/02/2002 18000 30 Table Royal tiger Sofa 22/02/2002 31000 8 30 9 Econo sitting 13/12/2001 9500 25 Sofa 10 paradise Dining 19/02/2002 11500 25 Table 11 Wood Double Bed 23/03/2003 25000 25 Comfort Old Fox 20/02/2003 17000 20 12 Sofa 13 Micky Baby Cot 21/02/2003 7500 15 (a) SELECT Itemname FROM Furniture WHERE Type="Double Bed"; (b) SELECT Dateofstock FROM Furniture WHERE Type="Sofa" order by Dateofstock; (c) SELECT Type, sum(Price) FROM Furniture group by Type; Define a function SHOWWORD () in python to read lines from a text file 3 28 STORY.TXT, and display those words, whose length is less than 5. OR Write a user defined function in python that displays the number of lines starting with 'H' in the file para.txt

	SECTION E	
planning network best ava	nputer Solutions is a professional consultancy company. The company is to set up their new offices in India with its hub at Hyderabad. As a adviser, you have to understand their requirement and suggest them the illable solutions. Their queries are mentioned as (i) to (v) below.	1
-	LOCK MEETING BLOCK	
	FINANCE BLOCK	
MEETI Expec Block HR Financ	ock Finance 40 NG Finance 80 ted number of computers Computers 25 e 120 NG 90	
(i)	Which will be the most appropriate block, where M/s Computer Solutions should plan to install their server?	
(ii)	Draw a block to block cable layout to connect all the buildings in the most appropriate manner for efficient communication.	
(iii)	What will be the best possible connectivity out of the following, you will suggest to connect the new set up of offices in Bengalore with its London based office. Satellite Link Infrared Ethernet	
(iv)	Which of the following device will be suggested by you to connect each computer in each of the buildings? • Switch • Modem • Gateway	
(v)	Company is planning to connect its offices in Hyderabad which is less than 1 km. Which type of network will be formed?	

34		2+3= 5
	(i) Differentiate between rb+ and wb+ file modes in Python.(ii) Consider a binary file "employee.dat" containing details such as	0
	(empno, ename, salary). Write a python function to	
	display details of those employees who are earning between 20000 and	
	30000 (both values inclusive).	
	OR (i) Differentiate between dump and load functions in binary files?	
	(ii) Write a Python function in Python to search the details of the employees	
	[name, designation, salary] whose salary is greater than 5000. The	
	records are stored in the file "emp.dat". consider each record in the file	
	emp.dat as a list containing name, designation and salary.	
35	(i) How many candidate key and primary key a table can have in a Database?	i i
	 (ii) Manish wants to write a program in Python to create the following table named "EMP" in MYSQL database, ORGANISATION: Eno (Employee No)- integer , Ename (Employee Name) - string Edept (Employee Department)-string, Sal (salary)-integer Note the following to establish connectivity between Python and MySQL: Username – root , Password – admin , Host - localhost The values of fields eno, ename, edept and Sal has to be accepted from the user. Help Manish to write the program in Python to insert record in the above table 	5
	OR (i) Differentiate between degree 2 conding lity key in DDDMS2	
4	 (i) Differentiate between degree & cardinality key in RDBMS? (iii) Vihaan wants to write a program in Python to create the following table named "EMP" in MYSQL database, ORGANISATION: Eno (Employee No)- integer, Ename (Employee Name) - string Edept (Employee Department)-string, Sal (salary)-integer Note the following to establish connectivity between Python and MySQL: Username – root, Password – admin, Host - localhost Help Vihaan to write the program in Python to Alter the above table with new column named Bonus (int).
